(PORTFOLIO LINK)

Detail-oriented Frontend Developer with 2+ years of experience crafting responsive, accessible, and high-performing web applications. Proficient in HTML, CSS, JavaScript -- tools I've mastered through years of hands-on development across diverse, user-focused projects. Comfortable building complex UIs with React, integrating APIs, and optimizing performance for modern web platforms. Adept at translating design into code with pixel-perfect precision.

Professional Experience

Skinstric AI | Frontend Engineer

Remote | March 2025 - Present

- Developed a real-time skin analysis web app using **React.js** and the **OpenAI Vision API**, achieving 98% detection accuracy.
- Created a dynamic UI with **CSS** and **GSAP animations**, increasing user engagement by 60%.
- Optimized app performance with **Next.js Server Components**, delivering sub-2-second skin analysis times.
- Built a custom **GSAP animation system** for seamless, interactive UX -- boosting user retention by 40%.
- Integrated advanced image-processing features to analyze skin tone and texture with precision.

Frontend Simplified | Frontend Developer Intern

Remote | January 2024 - August 2024

- Converted static React app into a **fully interactive experience** with animations, transitions, and carousels.
- Built dynamic views powered by live **API data**, **skeleton loaders**, **pagination**, and **React Router** for a clean UX.
- Collaborated in a remote team using **Git**, **GitHub**, and agile workflows for consistent deployment and delivery.

BlueRidgeGlamping | Frontend Designer & Engineer

Remote | January 2023 - February 2023

- Led a complete redesign of an underperforming business site for a niche AirBnB and consulting company, resulting in a more **intuitive**, visually appealing, and **high-converting** experience.
- Collaborated directly with business owners to gather requirements, prioritize features, and reorganize the site's structure for clarity and ease of use.
- Rebuilt the website from the ground up using **HTML**, **CSS**, and **JavaScript**, enhancing performance and mobile responsiveness.
- Implemented UX improvements that led to **increased call bookings** and stay reservations.
- Delivered a polished, reliable site that the company continued to use post-launch **without issues**.

Projects (personal)

Prime Video Clone | [Live Demo](#) | [Source Code](#)

Created a fully functional search platform for movies

- Developed a scalable movie search platform using **React**, with full **API integration**, loading states, and **dynamic routing** for individual movie pages.
- Designed a fully responsive UI with viewport-size breakpoints to ensure flawless performance across devices.

Spotify Clone | [Live Demo](#) | [Source code](#)

Recreated indistinguishable Spotify Desktop UI

- Developed Spotify's desktop UI with an emphasis on structure, layout precision, and design consistency.
- Built an intuitive search page and modular UI components to mirror Spotify's real-world design.

Technical Skills

Programming Languages: JavaScript, CSS, HTML, Python, C#

Frameworks: React, Firebase, NextJS, Redux, React Hook Form

Tools & Other platforms: Netlify, Vercel, GitHub, Figma, VSCode, Visual Studio, Stripe, Squarespace

Education:

Frontend Simplified Institute | June 2024 - March 2025

Frontend Development Program

Blue Ridge Community College (Dual Enrollment) | August 2021 - May 2023

Courses: Algebra II, Graphic Design, Java Development

A & E Christian Academy | Graduated May 2023

High School Diploma -- GPA: 3.8

freeCodeCamp.org | March 2019 - May 2021

Responsive Web Design Certification (300+ hours)

Completed a comprehensive, self-paced program starting at age 13 and earning certification by 15.

Interests

PC Building & Hardware Tinkering: Built and upgraded multiple custom PCs including ATX and Mini ITX form factors. Strong understanding of component synergy, bottlenecks, and hardware optimization at a range of budgets and task-optimized configurations.

Video Editing & AV Production: Proficient in DaVinci Resolve, Adobe Suite, and audio tech. Edited videos and managed sound for short films and a feature-length stop motion project, including voice acting and post-production work.
